

## THIS IS MUSIC TO OUR SOUL

Using music in English classes provides a wide range of teaching possibilities. If you are looking for practice that involves teaching grammar and vocabulary and still keeps students motivated and engaged, this may be a great opportunity to implement some rhythm into your classes. Working with music can provide fun ways to achieve the classes' main goals, such as karaoke and guessing games activities, and also enhance the proximity between students and teachers. So, turn your speakers on and press the play button!
